

TractionBack® Plus

Milliken™

ADHESIVE-FREE

NO RH limit
NO testing required

FOR USE WITH:
High-Moisture Conditions

USAGE OVERVIEW

Standard Milliken cushion backing with
TractionBack® high-friction coating + connectors

NEW CONSTRUCTION

ON-GRADE¹
AND
ABOVE-GRADE

READY TO INSTALL:
30 days after concrete has been poured²

NO MOISTURE
TESTING
REQUIRED

RENOVATION

ON-GRADE¹

NO MOISTURE
TESTING
REQUIRED

TractionBack® Plus is an adhesive-free solution designed for use if there are concerns about high moisture, or should there simply be a desire to avoid moisture testing

ABOVE-GRADE

NO MOISTURE
TESTING
REQUIRED

Effective for ALL above-grade renovation scenarios

Milliken TractionBack® Plus is a very low-VoC product.

¹ For below-grade scenarios, on-grade recommendations generally apply. However, please contact the Milliken Technical Services team (1-800-528-8453, option 2) to discuss your specific site parameters.

² Milliken's recommended minimum wait time for installations on newly poured concrete is 30 days. However, certain conditions may allow for installation to begin sooner. Please contact the Milliken Technical Services team for more information (1-800-528-8453, option 2).

For more detailed information and specifications, please refer to the current versions of Milliken's installation instructions and warranties, available at millikenfloors.com.

Standard Milliken cushion backing with TractionBack® high-friction coating + connectors

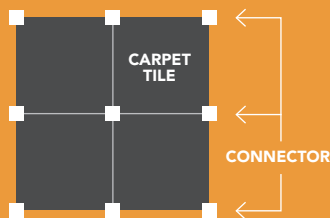

PRIMARY BENEFITS

TractionBack® Plus keeps carpet in place, without supplemental adhesives, floor sealers, or primers— and there are NO RH or pH limits

TractionBack® Plus combines a proprietary high-friction backing technology (TractionBack®) with the addition of connectors (applied separately). With the added connectors there is no longer a need for adhesives at the perimeter — in fact, TractionBack® Plus requires NO liquid or spray adhesives of any kind.

- NO moisture testing — NO RH or pH limits
- Priming and sealing is reduced or eliminated
- Time savings — no waiting for adhesives to dry
- TractionBack® Plus eliminates the VoCs associated with sealants and adhesives
- Tiles can be lifted and replaced multiple times with no loss of traction effect

A note about our connectors

TractionBack® Plus connectors are centered under each corner of the tile, regardless of tile size or installation method.

Installation benefits of Milliken cushion backing

TractionBack® Plus provides the same advantages that come with any Milliken cushion-backed modular product:

- Non-reactive backing greatly reduces floor prep time, and eliminates adhesive failures from plasticizer migration
- Unlike some products with thin thermoplastic backings, the thickness of our cushion will result in virtually no telegraphing
- Industry-best moisture management: TractionBack® Plus has NO RH or pH limits — NO moisture testing is required for ANY install, on-grade or above-grade

CONSIDERATIONS FOR THE REAL-WORLD

TractionBack® and TractionBack® Plus go hand in hand.

The two systems are identical aside from the addition of connectors with TractionBack® Plus. This is significant, because it is possible to start with TractionBack® and upgrade to TractionBack® Plus should unexpected moisture concerns arise during installation.

Or, perhaps TractionBack® was specified, but later in the process the use of perimeter adhesives becomes an issue, or it's determined that heavier rolling traffic will be part of the mix. In any of these cases, product already delivered can be used, with only the addition of TractionBack® Plus connectors.
